### what we are

Welcome to the international world of Pure Clean Air / PCA. PCA is a Emission Control company, launched in the year 1996. We are rich in know-how and unique with our services. Our wide spectrum of activities include, engineering, training and delivery of catalyst, filters and complete systems. We are independent from any catalyst manufacturer and offer our clients best-in-class solutions, from start to finish.

Our vision and mission is to get the air clean by reducing emission. Quality, customer satisfaction and corporate responsibility are the pillars. We earn our living by selling know-how and providing innovative, high quality, emission control solutions.

### our vision and mission

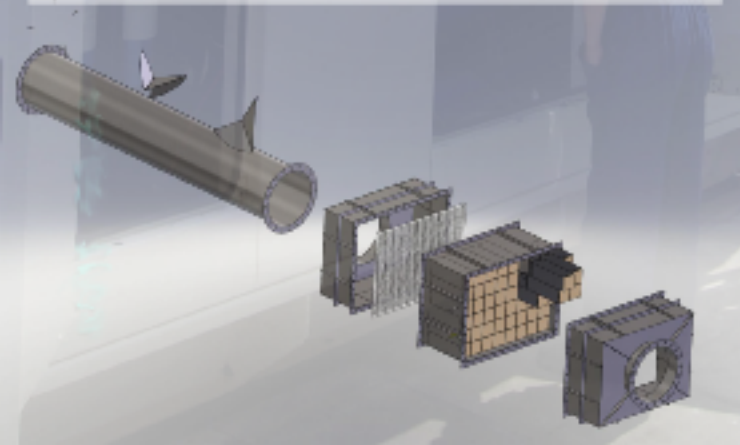

### our team

We have the right mix of experienced resources. Keeping in mind the various know how needed, PCA employs highly skilled chemical engineer, 3-D CAD specialist, electrical- and mechanical engineer. At PCA, we believe that human resources are the building blocks for success. All our team members are committed to the overall development of services and quality.

PCA's company success is based on discipline, passion and innovation. Our wide range of references speak volumes about the skills we possess. PCA looks back to over 25 years of successful activity in the industry. With independency, strong focus and vast experience, PCA brings a new approach to the market.

### our skills
